CYCAD & ZAMIAD. STUDY GROUP

Newsletter No. 3

May-June 1980

Greetings to all lovers of the cycadales. This time I have a few members for you to write to, and I hope you are doing so as a passive group can be a non-existent group.

Your 1980 Subscriptions of \$2.00 are now due.

SGAP,
Canberra Region,
P.O. Box 207,
Civic Square,
A.C.T. 2608.

Mrs. M. Zillman,
M/S 204,
LAIDLEY. 4341.
QLD.

Mr. Robert W. Reidl,
14 Auluba Rd.,
TURRAMURRA. 2074.
N.S.W.

Again I must urge that as at present we exist only by correspondence, please write to me and others in the group to discuss new findings or relate information gleaned of cycads in your districts or seen in your travels.

The newsletter at present depends on but two of us and it would be nice if all participated.

Mr. Noel McCormack also was very helpful with new information about the Bundaberg form of M. Pauli Guilielmi.

He has offered to let the group, or a delegation from SGAP come up and view and photograph the plants. From material received, these are a slightly different form to the type around Tin Can Bay areas.

MORPHOLOGY OF CYCADS
