Gardens for Life ANPSA 2024 Biennial Conference Melbourne

In this issue we have taken our cue from the many questions and comments that have come in since registration for the ANPSA 2024 Conference opened.

There is particular information about the tours, especially the Great Ocean Road Otways Tour and accommodation, in the vicinity of the venue, The Round, Nunawading.

We hear more from Phillip Johnson in regard to the themes he will address in his A J Swaby Address and we tell you more about the Grasslands Excursion.

We also add an exciting extra - the Conference Dinner, hosted by APS Maroondah. Please promote this conference to all your members.

Miriam Ford

Convenor - ANPSA 2024 Conference.

To register for the Conference and Tours go to

<https://www.anpsa2024conference.com/registration>

Conference Registration

Early Bird Rate

- \$585 AUD (ends 30 June 2024)

Full Conference Rate

- \$650 AUD

Registration includes access to all five days including any day excursions and conference catering.

Day Only Registration

- 1 Day Rate: \$160 AUD
- 2 Day Rate: \$290 AUD
- 3 Day Rate \$420 AUD

Registration includes access to all Conference Sessions on your nominated day of attendance including conference catering.

Pre and Post Conference Tours

Pre - 23 to 28 September 2024

Post - 5 to 10 October 2024

- **Grampians Wimmera Tour**
\$1800 AUD
(Pre Conference tour booked out)
- **Great Ocean Road Otways Tour**
\$2380 AUD
- **Gippsland Wilsons Promontory Tour**
\$2080 AUD
Single person supplement not included. Additional costs are required at registration.

Book your tour

<https://www.anpsa2024conference.com/registration>

Q & A for Tours

A lot of interest has been shown from the bookings already received for the three tours on offer. To guarantee your booking on any of the tours go to: <https://www.anpsa2024conference.com/registration>

Pre and Post Conference Tours

Grampians Wimmera (pre conference fully booked)
Great Ocean Road Otways
Gippsland Wilsons Promontory

For details on each of the tours go to:

<https://www.anpsa2024conference.com/>

and download the February newsletter. Each of the preceding newsletters is also available and also the Tour Edition of Australian Plants.

For each of our tours we have Coach Tours of Australia (CTOA) providing a comfortable fully equipped 48 seater coach with luxury reclining seats with lap/sash seat belts, toilet, fully air conditioned, PA system, and full air suspension for ride comfort, .

The maximum number of passengers on each tour will be 30. The numbers have been capped so that all our tours are a memorable experience for each passenger. There will be enough room on the coach for people to sit together or alone. There will be more time exploring the various locations with less people getting on and off the coach.

Drop Off and Pick Up

All tours will be departing and returning to The Round, 379 - 399 Whitehorse Rd, Nunawading Victoria 3131. Passengers will be notified of departure and return times closer to the date.

Car Parking

There are plenty of parking spaces for dropping off and picking up passengers but unfortunately no vehicles can be left in the car park of The Round during the six days of each of tour. While the tours are on there will be other functions at The Round therefore the car parking facilities will be required for anyone attending these events. It is best to make private arrangements for parking your car safely during the period of the tour/s.

Coach Captain and Tour Guides

There will be a coach captain on each tour. The coach captain's role is to see that the tour runs smoothly and can assist with any enquiries from passengers.

Specialist tour guides will join a tour at any stage. They are experts in their field and will be able to give an informed overview of an area which the tour will visit. They will carry a portable PA system (public address system) so all passengers will be able to hear their commentary.

Dietary Requirements

We are aware that some of our passengers have dietary requirements and will have the opportunity to inform us prior to the commencement of a tour.

Tour Booklet

A tour booklet will be issued to each of the passengers. This will contain the full itinerary, tour information, plant lists, information on any gardens visited, and any other information that is applicable.

Cancellation of a Tour

A tour may be cancelled if we do not meet the minimum number of passengers or for some other reason beyond our control. Passengers will be notified of this as soon as possible and given the choice of a refund or joining an optional tour. We are hopeful this will not be necessary.

Walking

Each tour will have several short walks but there may be a longer one or two on some of the tours. Not everyone is obliged to go on the longer walks.

Weather

At this time of the year the weather can be very unpredictable and variable. In the first instance spring is a time of extreme variables in weather, so a comprehensive wardrobe to counteract extremes in temperature will be wise.

What to Bring on the Tours

This information will be issued to passengers well before the commencement of each tour. We are aware that some may leave early to visit family or other areas of our beautiful state, Victoria.

Tour Pricing

The costs of the tours vary because of accommodation charges in the areas they are visiting. This is particularly the case for the Great Ocean Road Otways tour where the promotion of the tourist industry has increased accommodation prices substantially.

Looking forward to seeing you on our tours

Student Discount for the ANPSA 2024 Biennial Conference

APS Victoria will be sponsoring up to 50 students for the ANPSA 2024 Conference.

The sponsorship will be equivalent to half price of a one day registration. That is half of \$160 (a one day registration) which equals \$80. This amount can apply to any student registration whether it be for one, two, three days or the full conference.

The Conference website will be amended to allow this to be accessed by students upon registration. Students will require proof of ID at the time of registration.

Chelsea Australian Flower Garden at Olinda - see more on page 4

ANPSA 2024 Biennial Conference Dinner **Wednesday 2 October 2024, 6:30pm** **The Round in Nunawading**

The Maroondah Group of APS Victoria is organising a dinner for those attending the ANPSA Biennial Conference.

The dinner will be held at The Round in Nunawading (the venue for the lectures) on Wednesday 2 October 2024. It will be a 2 course meal commencing at 6.30pm, in the upstairs function room, at a cost of \$65 per person. Drinks will be at bar prices.

This will be an opportunity for people to unwind after a long day of attending lectures. There will be no after-dinner entertainment but rather the evening will be a time for relaxing and socialising.

- Please meet in the downstairs theatre foyer. We will go upstairs for dinner around 6.15pm.
- The Booking Form should be completed and returned to ANPSADinner@gmail.com. (see booking form at the end of this newsletter)
- Bookings for the dinner will close on Friday 13 September 2024.
- All enquiries regarding the dinner should be directed to either the above email address or Alison on 0438 694 600.

Wednesday 2 October 2024

(Time to be confirmed - approx. from 3pm onwards)

**The Round, 379-399 Whitehorse Road,
Nunawading, Victoria**

“Connected through nature”

For the last 25 years Phillip Johnson has focused his career on re-establishing a connection to nature for his clients by designing, building and maintaining sustainable habitats that help to heal the earth and the soul. Phillip's presentation will follow the evolution of his work focusing on the importance of working with nature given the world's extreme weather conditions. It will also look at the various design solutions that his team have created to help address these issues by mimicking natural environmental systems.

The presentation will also follow Phillip's critical journey as a passionate advocate for biodiversity and the importance of habitat creation and greening our urban environments. Phillip will emphasize that by healing our environment, we heal ourselves at the same time.

For Phillip, nature's beauty is the perfect reference in sustainable design and practice and each landscape he transforms, nurtures the environment and helps to heal the soul of its owners and the people that engage with it.

Grasslands Excursion

Text: Debbie Reynolds, Chris Clarke, and Miriam Ford.

All other day excursions have been described in earlier newsletters.

Less than 2% of Victoria's grasslands remain intact and some of the best and most diverse examples are on the outskirts of Melbourne. Our Grasslands excursion will include the Evans Street Grasslands in Sunbury and Iramoo at the Victoria University which are two of the best examples of original grassland flora of the Keilor basalt plains. The Victorian volcanic plains grasslands were described as *fields of gold* by the first waves of

Fields of Gold.

European settlers and they were most likely referring to the brilliant yellows of Podolepis, Button Wrinkleworts and Billy Buttons which flourish in these areas. The extraordinary diversity of our Victorian Grasslands is something to celebrate and cherish and yet so much of it has been lost due to settlement and agriculture. Attendees will have the opportunity to see some truly astonishing wildflower areas. Dr Debbie Reynolds will lead the tour and has focussed her PhD research and ongoing work into saving critically threatened grassland species, in particular *Pimelea spinescens* subsp *spinescens*.

Pelargonium rodneyanum.

Evans Street Grasslands, Sunbury

This is a small species rich grassland located between the Melbourne-Bendigo Railway and Evans Street, Sunbury, 30km northwest of Melbourne. It is 3.3 hectares and there is an access track with interpretive signage along the east and south sides of the reserve. The Friends of the Evans Street Wildflower Grassland help to maintain the quality of the grassland. It was 'discovered' in 1983 by another Friends group scoping for seed sources for grassland restoration and was described by the late Dr Jim Willis, Government Botanist as *the best example ever seen of an original grassland flora typical of the Keilor basalt plains...a community of native plants surviving to the present day in such a vigorous and relatively pure condition*.

At one point the council wanted to turn the grasslands into a car park and "move it somewhere else" but community action saved the day. This area remains one of the best native grasslands in the Melbourne region with a number of state and federally listed rare plant species. Species present include *Pelargonium rodneyanum*, *Arthropodium strictum*, *Stylidium graminifolium* and many others including a variety of grasses such as *Themeda triandra*, *Poa sieberiana* and *Dichanthium sericeum*. A highlight is the reintroduction of the almost extinct *Diuris fragrantissima* and orchids such as *Thelymitra arenaria* and *Diuris chryseopsis* feature as well. *Brunonia australis*, *Dillwynia cinerascens*, and *Stackhousia subterranea* should be in flower.

Diuris chryseopsis.

Iramoo Wildflower Grassland Reserve, Victorian University

With the closure of the Albion explosives factory and the creation of Victoria University another piece of good fortune and far-sighted conservation created

a 40-hectare volcanic plains grasslands reserve in St Albans. The site is Crown land and under the Cairnlea Conservation Reserves Committee of Management. Since 2015 while working with the Friends of Iramoo we have planted over 20,000 wildflowers directly, spread hundreds of thousands of seeds and reintroduced many endangered species. We will have lunch at the Friends' nursery and classroom and see their seed bank gardens as well.

The reserve is a *Themeda* dominated grassland and home to a large population of Striped Legless Lizards (*Delmar impar*). Over the last 30 years a grassland infested with Serrated Tussock has been slowly transformed into a superb example of the original flora. Staff and The Friends of Iramoo volunteers have shifted the balance towards a *Themeda triandra* system and reintroduced rare species such as *Pimelea spinescens* subsp *spinescens*, *Rutidosis leptorhynchoides*, *Geranium* sp 1 and *Podolepis linearifolia*.

Geranium sp. 1.

Brunonia australis.

A walk through the grassland reveals a remarkable diversity of species of varying textures and colors which includes beautiful daisies such as *Minuria leptophylla*, *Leucochrysum albicans* var *albicans*, *Rhodanthe anthemoides* and swathes of *Chrysocephalum*. Other feature plants include the tall Mulla Mulla, *Ptilotus macrocephalus*, *Goodenia pinnatifida* and *Arthropodium minus*.

Goodenia pinnatifida.

Walking quietly and looking closely reveals many resident pollinators. When managed well, our grasslands can be very diverse ecosystems with flowers, herbs, lillies and orchids as well as a variety of grasses and people on this excursion will have the rare opportunity to see and hear about what is being done to preserve and protect the remaining remnants.

Thelymitra arenaria.

Accommodation

Hotels and Motels near The Round, Nunawading

Current 6 March 2024

Nunawading Railway Station is the closest to the Round. It is 1km distance, 15-20 minutes walk.
Nunawadding Station is on the Lilydale and Belgrave lines from the CBD.

<p>Canterbury International Hotel - 4 star 326-330 Canterbury Road Forest Hill 3131 events@canterburyinternational.com.au Ph: 03 9878 4111</p>	<p>Rate quoted under \$130 per night includes breakfast. Reception manned.</p>	<p>4km to The Round, 6 minutes by car Walking 1.25 hours due to hilly terrain. Forest Hills shopping centre close by. Major supermarkets, pharmacies, food court and restaurants. To Warrnambool and Beyond Great Ocean Road Otways Tour

Text and Photos: Kevin Sparrow.

Before and after the ANPSA Biennial Conference in Melbourne, tours to three different locations are being organised: to the Grampians and Wimmera; Wilsons Promontory and Gippsland; and one travelling along the Great Ocean Road visiting the Otway Ranges before travelling on to Warrnambool and beyond.

The 6-day/5-night Great Ocean Road/Otway Ranges tour will spend two nights in Anglesea, one night in Apollo Bay and two nights in Warrnambool before returning to Melbourne along the Princes Highway. Along the way, there will be stop-offs at local gardens and tourist attractions as well as exploring some of the delights of the Otway Ranges and Great Ocean Road.

Three amazing gardens await your arrival in Warrnambool, first up almost in the centre of Warrnambool, is the Swan Reserve Garden, maintained by the Friends of Swan Reserve, now an annex to the Warrnambool Botanic Gardens. Following this will be a 15-minute trip out towards Tower Hill to the gardens of Ross Dawson and Sue Blood and then on to the gardens of David and Linda Handscombe. Both of these large gardens are magnificent and will be the highlight of the tour.

Warrnambool is renowned for its natural areas, especially its beaches, but the southwest is also where

Thyridia repens.

Warrnambool & District APS
logo with *Correa* "Grannys
Grave".

the clearing of vegetation began in Victoria, so little of the original vegetation remains. Despite this, a stroll along the Promenade Walk around Lady Bay will introduce you to many local native species, some are remnants, some have been planted by Council or the local Coastcare-Landcare Group. APS Warrnambool and District registered the local form of *Correa reflexa*, *Correa* “Grannys Grave” recognising the local name for the area where it occurs naturally. It is now the APS group’s floral emblem. Other surviving coastal natives include *Leucopogon parviflorus* (Coast Beard-heath), *Pimelea serpyllifolia* subsp. *serpyllifolia* (Thyme Rice Flower) and *Stackhousia spathulata* (Coast Stackhousia). Threatened species, *Adriana quadripartita* (Coast Bitter-bush) and *Roepera* (was *Zygophyllum*) *billardierei* (Coast Twin-leaf) can usually be seen growing around the coastal areas.

Lake Pertobe.

Lake Pertobe, a massive tourist attraction, is largely a manufactured environment, many plants here have been planted or are weeds. However native species do survive, mostly small wetland species and herbaceous plants, including *Lobelia irrigua* (Salt Pratia), *Samolus repens* (Creeping Brookweed), and *Thyridia repens* (Monkey Flower); if you look carefully, you can still find them. A surprising find last year in the water itself was *Najas marina* (Holly-leaf Water-nymph) a critically endangered species in Victoria. This has only been recorded once before at Bemm River in Gippsland in 1978!

Stackhousia spathulata.

Roepera billardierum. Syn. *Zygophyllum billardierum*.

Najas marina.

Suitable Reference Books for the pre and post Conference Tours

APS Victoria has a selection of books that can be purchased through their book sale.

Email to Bill and Sue at apsvicbooks@gmail.com or ring on (03) 9872 3583. These would be suitable for reference books for any of the pre and post conference tours.

Please note that there are limited copies available for some of these titles – first in, first served.

Grampians Wimmera Tour

Discovering the Grampians Gariwerd: visitors' guide to the National Park including walks, indigenous flora and fauna (\$12.50).

Grampians/Gariwerd from the Air: clear aerial photographs of mountains, rocks, valleys, lakes and reservoirs, with features marked on them (\$30).

Grampians in Flower, 3rd edition: photographic guide with short descriptions of almost 400 indigenous plant species (\$15).

History and Field Guide to Grampians (Gariwerd), Western Victoria: covers Aboriginal and European histories, walking trails, wildflowers, waterfalls and birdlife (\$30).

Plant Identikit: Common Native Plants of the Grampians: pocket guide with descriptions and illustrations of about 50 common species of the area (\$10).

Birds and Plants of the Little Desert – a photographic guide: covers two thirds of the plants and most of the birds that have been recorded in the Little Desert and surrounding areas (\$40).

Great Ocean Road Otways Tour

Coastal Guide to Nature and History 3: Western Victoria: covers the landforms, plants and animals along the coast from Point Lonsdale to the South Australian border (\$25).

Field Guide to Seashores of South East Australia: photographs and descriptions of about 240 species of plants and animals commonly found the south-eastern coastline of the Australian mainland and Tasmania (\$30).

Flowers of Anglesea and Aireys Inlet: photographs and descriptions of over 300 of the most common plant species, arranged by flower colour (\$20).

Orchids of Anglesea and Airey's Inlet: photographic field guide with detailed descriptions of 115 species of terrestrial orchids indigenous to the area (\$30).

Plants of the Great South West: (\$35).

Wildlife of Victoria's South West: photographic field guide to 432 taxa of native animals of Grampians-Gariwerd, Victoria's Volcanic Plains, Melbourne and surrounds (\$37.50).

Gippsland Wilsons Promontory Tour

Discovering the Prom: visitors' guide to the National Park including walks, indigenous flora and fauna (\$12.50).

Eucalypts of the Strzelecki Ranges and surrounding areas: identification kit describing 39 eucalypt species indigenous to the region east and south of Melbourne (\$40).

Plant Identikit: Common Native Plants of Wilson's Prom: pocket guide with descriptions and illustrations of about 50 common species of the area (\$10).

Field Guide to the Seashores of South Eastern Australia: photographs and descriptions of about 240 species of plants and animals commonly found the south-eastern coastline of the Australian mainland and Tasmania (\$30).

Wildflowers of the Wilderness Coast: photographs and descriptions of over 200 plant species of the coastal area between Orbost and Eden, arranged alphabetically within habitats (\$20).

Books you purchase will be available on the coach on the first day of your tour. Alternatively you may make arrangements to have the books posted to you prior to the Conference.

Any of the above books are available through the APS Vic Book Sales:

Email: apsvicbooks@gmail.com

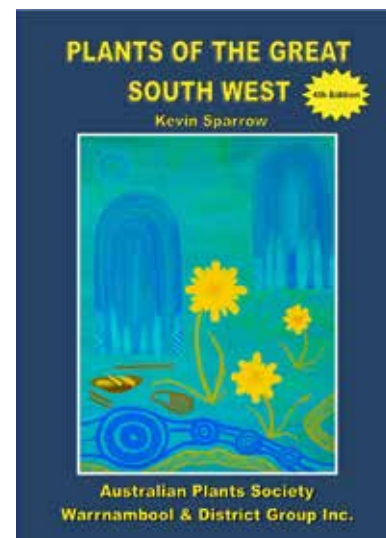

Phone: (03) 9872 3583

Plants of the Great South West a guide to the plants of south west Victoria

In 2004, Kevin Sparrow (see profile of Kevin below) compiled the popular local plant book, "Plants of the Great South West", a guide to the plants of south west Victoria. In 2013 and 2020, he published subsequent improved editions. The fourth Edition has just been released. The new book has expanded the number of plants by 120 from the previous edition. It now features 723 plants (528 pages) The book covers a huge variety of plants from Port Campbell to the South Australian border and features hundreds of photos taken by Kevin and other local naturalists. This book has been published by the Australian Plants Society - Warrnambool & District Group.

This book would be very suitable as a reference for anyone visiting the area especially those on the pre and post conference tour of the Great Ocean Road Otways.

This book is available through the APS Vic Book Sales, Collins Books Booksellers Warrnambool and Ironbird Bookshop Port Fairy.

Profiles of Committee Members for the ANPSA Conference 2024

Kevin Sparrow

Kevin has been a member of APS since 1989 and has served on the APS Warrnambool committee in all major positions in that time. He has served two terms as President, various terms as Secretary and Treasurer and

is currently the Newsletter Editor. In 2017, he was awarded an Imprensa Award for his services to APS Warrnambool. He is a keen grower and propagator of Australian Native plants and freely shares around his knowledge and plants.

Kevin has been President of the Friends of Swan Reserve since it was formed in 2010 and has played a significant role in the further development of the garden in Warrnambool. The garden has become a popular attraction in Warrnambool and is now an Annex to the Warrnambool Botanic Gardens.

Greg Brown

Greg joined APSVic at the end of 2007, after he purchased a house / land package in Tarneit, and wanted information on the use of native plants for the garden. At the time Greg was living in Glen Waverley, and APS Maroondah

fitted his schedule best. Even after moving to Tarneit, he maintained his membership of APS Maroondah - simply because you don't give away access to that much knowledge.

At the AGM in 2013, Greg was elected President of APS Vic. Following the completion of his term, he maintained membership of the executive until 2019. Most recently he has been an active member of the ANPSA 2024 organising committee.

The ANPSA 2024 Conference Organisers look forward to welcoming you to Victoria.
