ASSOCIATION OF SOCIETIES FOR GROWING AUSTRALIAN PLANTS.

AUSTRALIAN PLANTS FOR CONTAINERS STUDY GROUP NEWSLETTER NO. 10.

Notice was given in the last Newsletter that circumstances had persuaded me to relinquish my position as Study Leader, Australian Plants for Containers Study Group. At the same time an invitation was extended to anyone wishing to take over the position. Unfortunately no reply to the invitation was received. In fact there was no communication of any kind so there is no information to pass on in this final Newsletter.

I have gained by the experience as leader and thank those active members who have kept the Newsletter going by generously sharing their knowledge, their successes and their failures. Three in particular I mention, Annette Hallpike, Bill Watkins and Graeme Mee.

The financial support of Regions and Groups is much appreciated; in these days of ever rising costs the project would have been impossible without it.

I have no knowledge of the future of this Study Group. Hopefully someone will come forward as a leader because widespread interest has been generated and contact come from overseas. Rather unfortunately this interest has expressed itself in a desire to receive rather than provide information. The demand is there; perhaps someone can reverse the trend?

At this stage any enquiries should be directed to Barbara Daly, Study Group Co-Ordinator, 8 Bussell Crescent. Cook. A.C.T. 2614.

Best wishes for the future and good gardening,

Margaret Barbour
