Plants : Very little to say until something blooms, or someone sends me some new information. Some of your plants must be doing something ! Members Jan Glazebrook & Denis Cox have been touring (by van) the NT & Kimberleys, & so should have some info shortly. I have some flower shots of *B. chillagoensis*, *B. 'Jasper Belle'* & others, but 35 mm slides take 6 weeks or so to be developed these days, as they go overseas. I am saving up to go digital very soon, but need a few more shots to finish off the 35 mm roll.

Best wishes to all.

Kerry.
