Ptilotus Study Group

No 5, December, 2000.

P.O.

Box 14,

Gladstone.

N.S.W. 2440.

Dear Members,

Not a lot to report this time, however I do have a few photos to share with you. My Aunty, Mrs Joan Booth, went on a trip through Central Australia during July. She left with the instructions " Please get me some photos of anything that even vaguely looks like Ptilotus!"

Here are the results:

Below: Ptilotus exaltatus on crest of hill, Henbury Meteorite Craters, N.T.

(Photo: Joan Booth)

Above: *Ptilotus polystachyus* (?), growing along the Lasseter Highway, N.T.

Below: *Ptilotus nobilis*(?) at the Breakaways, Coober Pedy, S.A.

(Photos: Joan Booth)

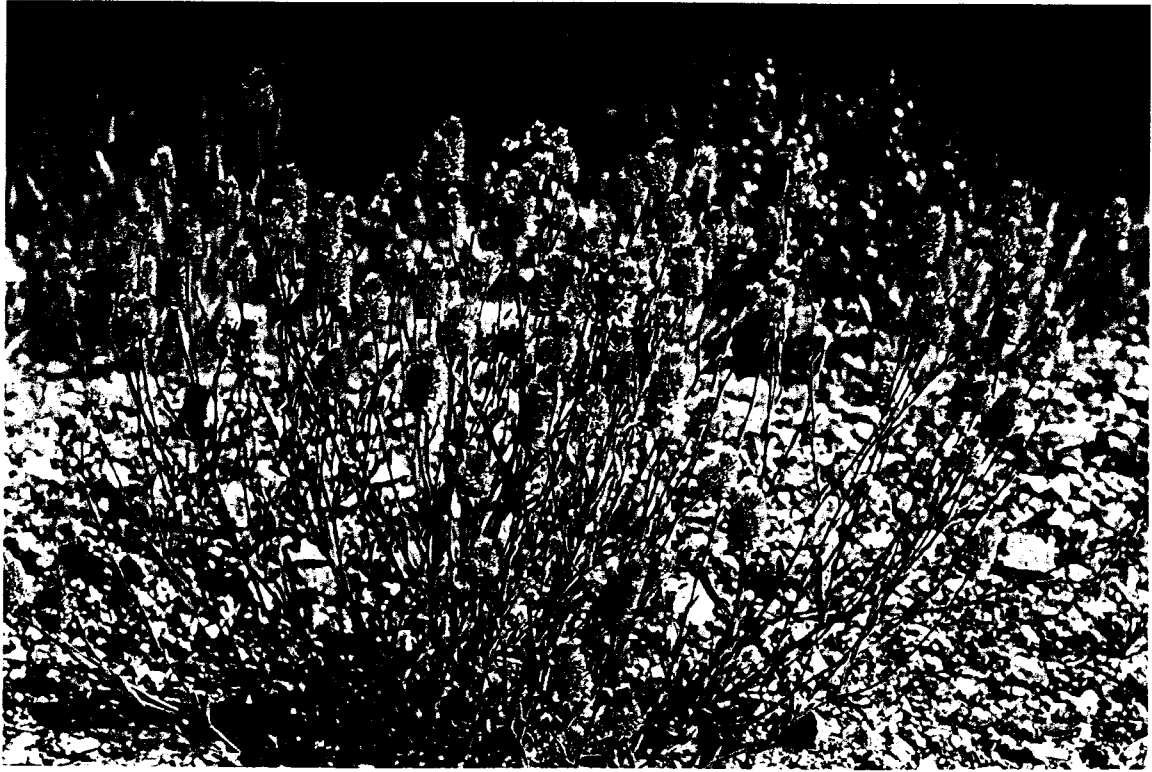

Above: *Ptilotus obovatus* growing at the foot of the cliff, Yourambulla Caves, Just Hawker, S.A. (Photos : Joan Booth)

Below: *Ptilotus obovatus*.

Above: *Ptilotus helipteroides* (?), near Arlington Pub, East MacDonnell Ranges, N.T.

(Photo: Joan Booth)

Cheers,

Karen Marriott.

MEMBERSHIP LIST

At 31st December, 2000.

INDIVIDUALS:

Peter Abell,
University of Sydney – Plant Breeding Institute,
Private Bag 11,
Camden.
N.S.W. 2570

Jocelyn Bishop,
C/o Post Office,
Perthville.
